

Z-Ring Controller

Model 300002

QEES

Technology

Z-Wave Remote control
4 Programmable groups
Primary controller functionality
Up to 400ft. range with routing

The QEES Z-Ring controller is a Z-Wave based remote control. Z-Wave is a fast growing RF wireless technology for controlling and automating homes and offices. The QEES Z-Ring controller lets you control other Z-Wave based devices such as Lights, blinds, HVAC, standby usage, etc.

The QEES Z-Ring control is a stylish and easy to use remote control with advanced functionality made simple. The Z-Ring is designed to fit in a key chain, making it available when leaving home or when returning home. A total of 4 groups are supported for individual controlling of devices or scenes. .

The QEES Z-Ring controller also supports including and exclusion of devices in the Z-Wave network as well as other Z-Wave administrative tasks. The QEES Z-Ring controller allows you to control any Z-Wave product regardless of vendor.

QEES @ Home.

Add comfort to your living with the QEES Z-Ring controller. The QEES Z-Ring controller allows you to control light settings, HVAC, Blinds, etc. – Or everything else that makes use of the Z-Wave technology. Use the Z-Ring to make sure all light and standby usage are off when leaving home. Open or close the garage door from your car. Use the Z-Ring to turn on the lights, before entering the home when coming home at night or evening. The QEES Z-Ring control uses RF to overcome the limitations with IR, meaning you will be able to control devices in other rooms without line of sight.

QEES @ Work.

In office automation the QEES Z-Ring controller lets you impress your clients in your conference room. Adjust light settings, blinds, AV equipment such as projectors, etc. Prepare the room for your AV presentation with one push of a button, when done push again and the light comes on, projector is turned off and blinds opens. The QEES Z-Ring controller allows you to control the surrounding environment from your pocket, and lets you keep focus on clients.
