QEES Wall
Model 300003

QEES @ Home.
Add comfort to your living with the QEES Wall switch. The QEES wall switch allows you to control light settings, HVAC, Blinds, etc. – Or everything else that makes use of the Z-Wave technology. Use the wall switch to make sure all light and standby usage are off when leaving home. Open or close the garage door from your car.

The QEES wall switch control uses RF to overcome the limitations with IR, meaning you will be able to control devices in other rooms without line of sight.

QEES @ Work
Control light, blinds, projectors, etc. from a single wall switch. QEES Wall can be supplied from a DC source to avoid batteries in office installations.
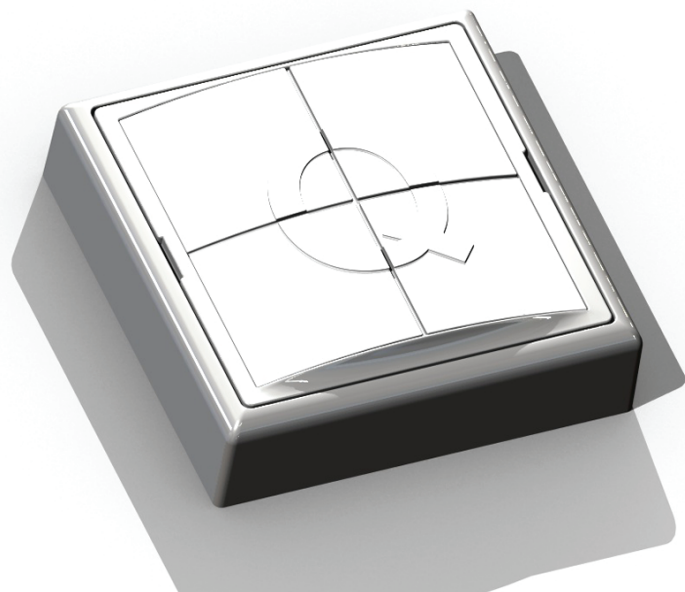

Z-Wave Remote control

4 Programmable groups

Primary controller functionality

Up to 400ft. range with routing

Battery operated - no wires needed

DC Power option

The QEES Wall switch controller is a Z-Wave based remote control. Z-Wave is a fast growing RF wireless technology for controlling and automating homes and offices. The QEES Wall switch controller lets you control other Z-Wave based devices such as Lights, blinds, HVAC, standby usage, etc.

The QEES Wall switch is a stylish and easy to use remote control with advanced functionality made simple. The wall switch is designed for wall mount with no wires needed. A total of 4 groups are supported for individual controlling of devices or scenes. .

The QEES wall switch controller also supports including and exclusion of devices in the Z-Wave network as well as other Z-Wave administrative tasks. The QEES wall switch controller allows you to control any Z-Wave product regardless of vendor.
